Packaging Solutions Provider

Filled-pack trial checklist

Use this planning sheet to compare sample packs under consistent project conditions.

Before requesting samples

- [ ] Record the product, lot or sample reference, fill weight, expected pack dimensions and current pack.
- [ ] Document the intended filling equipment, closure, storage and handling.
- [ ] Agree which team will check each trial item and sign off the candidate pack.

During the trial

- [ ] Identify each candidate by a sample reference and compare samples using the same product and fill.
- [ ] Observe fit on the line, the condition of the seal area and the filled dimensions.
- [ ] Check case fit, opening, dispensing or reclosure as applicable to your project.

After the trial

- [ ] Keep sample IDs, observations, constraints and any required follow-up together.
- [ ] Record which candidate and revision will advance to the next review.
